VOLUME 11
1960

ACADEMIC PRESS, NEW YORK AND LONDON

COPYRIGHT©, 1960, BY ACADEMIC PRESS INC.

ALL RIGHTS RESERVED

NO PART OF THIS VOLUME MAY BE REPRODUCED IN ANY FORM, BY PHOTOSTAT, MICROFILM, OR ANY OTHER MEANS, WITHOUT WRITTEN PERMISSION FROM THE PUBLISHERS.

Made in the United States of America

CONTENTS OF VOLUME 11

Number 1, May 1960

Magdalena Reissig and Albert S. Kaplan. The Induction of Amitotic Nuclear Division by Pseudorabies Virus Multiplying in Single Rabbit Kidney Cells 1

Albert S. Kaplan and Tamar Ben-Porat. The Incorporation of C^{14}-Labeled Nucleosides into Rabbit Kidney Cells Infected with Pseudorabies Virus 12

Harry Rubin. Growth of Rous Sarcoma Virus in Chick Embryo Cells Following Irradiation of Host Cells or Free Virus 28

D. J. Bradish and L. V. Crawford. Biophysical Studies of the Interactions between the Viruses of Tobacco Mosaic and Tomato Bushy Stunt and Their Rabbit Antisera 48

R. W. Horne, A. P. Waterson, P. Wildy, and A. E. Farnham. The Structure and Composition of the Myxoviruses. I. Electron Microscope Studies of the Structure of Myxovirus Particles by Negative Staining Techniques 79

Nils Aall Barricelli. An Analytical Approach to the Problems of Phage Recombination and Reproduction. I. Multiplicity Reactivation and the Nature of Radiation Damages 99

Nils Aall Barricelli and A. H. Doermann. An Analytical Approach to the Problems of Phage Recombination and Reproduction. II. High Negative Interference 136

Albert Siegel. Studies on the Induction of Tobacco Mosaic Virus Mutants with Nitrous Acid 156

W. K. Joklik, Gwendolyn M. Woodroofe, I. H. Holmes, and Frank Fenner. The Reactivation of Poxviruses. I. Demonstration of the Phenomenon and Techniques of Assay 168

Frank Fenner and Gwendolyn M. Woodroofe. The Reactivation of Poxviruses. II. The Range of Reactivating Viruses 185

W. K. Joklik, I. H. Holmes, and Margaret J. Briggs. The Reactivation of Poxviruses. III. Properties of Reactivable Particles 202

Anne Gemmell and Frank Fenner. Genetic Studies with Mammalian Poxviruses. III. White (*u*) Mutants of Rabbitpox Virus 219

G. W. Rushizky and C. A. Knight. An Oligonucleotide Mapping Procedure and Its Use in the Study of Tobacco Mosaic Virus Nucleic Acid 236
Werner Arber. Polylysogeny for Bacteriophage Lambda 250
Werner Arber. Transduction of Chromosomal Genes and Episomes in *Escherichia coli* 273

DISCUSSION AND PRELIMINARY REPORTS

A. T. Matheson and C. A. Thomas, Jr. The Indirect Effects Accompanying P^{32} Suicide of Bacteriophage 289
Edwin D. Kilbourne. The Inaccessibility of Genetically Active but Noninfective Influenza Virus to the Intracellular Action of Ribonuclease 291
Solon A. Ellison, Rose R. Feiner, and Ruth F. Hill. A Host Effect on Bacteriophage Survival after Ultraviolet Irradiation 294
W. E. Magee, M. R. Sheek, and M. J. Burrous. The Synthesis of Vaccinial Deoxyribonucleic Acid 296
Ruth Kirschstein, Samuel Baron, Gerald S. Borman, Roderick Murray, F. T. Perkins, and George Hottle. Neurovirulence of Attenuated Type 1 Poliovirus Vaccine Strains after Intramuscular Inoculation of Rhesus Monkeys . 300
S. Edward Sulkin, Rae Allen, and Ruth Sims. Lipotropism in Pathogenesis of Encephalitis Viruses in Insectivorous Bats 302
Horace L. Hodes, Helen D. Zepp, and Eugene Ainbender. A Physical Property as a Virus Marker. Difference in Avidity of Cellulose Resin for Virulent (Mahoney) and Attenuated (LSc, 2ab) Strain of Type 1 Poliovirus 306
Jørgen Fogh and Donald C. Stuart, Jr. Intracellular Crystals of Polioviruses in HeLa Cells 308
Joseph M. Steim and Martin Hanig. Nonconvertibility of "Slow" to "Fast" Influenza Virus from De-Embryonated Eggs by Action of Cyanide 311
Jerrell B. Emery and Charles J. York. Occurrence of a Hemadsorption Virus in Normal Monkey Tissue Culture . . . 313
Erratum 316

Number 2, June 1960

Katherine Esau. The Development of Inclusions in Sugar Beets Infected with the Beet-Yellows Virus 317
David E. Schlegel. Highly Infectious Phenol Extracts from Tobacco Leaves Infected with Cucumber Mosaic Virus 329

.LLAN CAMPBELL. On the Mechanism of the Recombinational Event in the Formation of Transducing Phages 339
ROBERT M. DOUGHERTY, JOHN A. STEWART, AND HERBERT R. MORGAN. Quantitative Studies of the Relationships between Infecting Dose of Rous Sarcoma Virus, Antiviral Immune Response, and Tumor Growth in Chickens 349
ALFRED M. PRINCE. Quantitative Studies on Rous Sarcoma Virus. V. An Analysis of the Mechanism of Virulence of the Bryan "High Titer" Strain of RSV 371
ALFRED M. PRINCE. Quantitative Studies on Rous Sarcoma Virus. VI. Clonal Analysis of *in Vitro* Infections 400
. P. MACKINNON. Combined Transmission by Single Aphids of Two Viruses that Persist in the Vector 425
K. A. O. ELLEM AND J. S. COLTER. The Interaction of Infectious Ribonucleic Acid with a Mammalian Cell Line. I. Relationship between the Osmotic Pressure of the Medium and the Production of Infectious Centers 434
P. WILDY, M. G. P. STOKER, I. A. MACPHERSON, AND R. W. HORNE. The Fine Structure of Polyoma Virus 444
A. COHEN AND F. BIDDLE. The Effect of Passage in Different Hosts on the Inhibitor Sensitivity of an Asian Influenza Virus Strain 458
FRANCIS B. GORDON, HENRY H. BLOOM, AND HERMOISE K. MAMAY. Studies with Drug-resistant Strains of Psittacosis Virus. I. Comparison of Four Strains Used in Mixed Cultures 474
FRANCIS B. GORDON, HERMOISE K. MAMAY, AND ROY W. TRIMMER. Studies with Drug-resistant Strains of Psittacosis Virus. II. Derivation of Strains with Dual Drug Resistance from Mixed Culture of Singly Resistant Strains 486

DISCUSSION AND PRELIMINARY REPORTS

H. ZECH. Intermediary Products Formed during Tobacco Mosaic Virus Reproduction 499
M. F. DAY AND D. G. VENABLES. Purification of Cauliflower Mosaic Virus 502
H. G. WITTMANN. Tryptic Peptides within the Polypeptide Chain of Tobacco Mosaic Virus and a New Manner of Determining Their Arrangement 505
TOSHIO FUKASAWA AND HIROSHI NIKAIDO. Formation of Phage Receptors Induced by Galactose in a Galactose-sensitive Mutant of Salmonella 508
JAMES S. MURPHY. An Agent Derived from *B. megaterium* Phage G Which Dissolves the Bacterial Cell Wall 510

Nils Björkman and Mato Sibalin. Indications of Multiplication of Porcine Enterovirus within the Intracellular Canalicular System 513
Erratum 518

Number 3, July 1960

K. O. Smith and D. G. Sharp. Interaction of Virus with Cells in Tissue Cultures. I. Adsorption on and Growth of Vaccinia Virus in L Cells 519
Dwight E. Wilson. The Effects of Ultraviolet Light and Ionizing Radiation on the Transduction of *Escherichia coli* by Phage P1 533
Boris Ephrussi and Howard M. Temin. Infection of Chick Iris Epithelium with the Rous Sarcoma Virus *in Vitro* 547
L. Philipson, P. Å. Albertsson, and G. Frick. The Purification and Concentration of Viruses by Aqueous Polymer Phase Systems 553
Bernard Roizman, M. David Hoggan, and Jerome Cornfield. Linear and Parabolic Estimates of the Titers of Herpes Simplex from Pock Counts on the Chorioallantoic Membrane of Embryonated Eggs 572
H. G. Pereira. A Virus Inhibitor Produced in HeLa Cells Infected with Adenovirus 590
John Cairns. The Initiation of Vaccinia Infection 603
P. R. Whitfeld, M. F. Day, K. Helms, and D. G. Venables. On the Chromatographic Evidence for the Occurrence of an Infective Ribonucleic Acid Fraction in Leaves Infected with Tobacco Mosiac Virus 624

DISCUSSION AND PRELIMINARY REPORTS

Eiichi Furusawa and Windsor Cutting. Detection of Viral DNA in the Inclusion Bodies of Ectromelia-infected Tumor Cells with Fluorescence Microscopy 632
Edward de Maeyer. Plaque Formation by Measles Virus 634
S. S. Stone. Multiple Components of Rinderpest Virus as Determined by the Precipitin Reaction in Agar Gel 638
L. A. Heller and C. R. Salenstedt. One-Sided Immunologic Relation between Adenovirus and Infectious Canine Hepatitis Antigens 640
J. W. Hartley and W. P. Rowe. A New Mouse Virus Apparently Related to the Adenovirus Group 645
A. J. Girardi and M. R. Hilleman. Lack of Identity of Polyoma Virus and Pneumonia Virus of Mice (PVM) 648

Robert A. Crandell and James R. Ganaway. A Study of the Antigenic Relationships between Feline and Human Viruses. 649

Number 4, August 1960

. H. Cadman. Studies on the Relationship between Soil-borne Viruses of the Ringspot Type Occurring in Britain and Continental Europe 653

ames E. Darnell, Jr. and Thomas K. Sawyer. The Basis for Variation in Susceptibility to Poliovirus in HeLa Cells 665

heodor Zimmermann and Werner Schäfer. Effect of p-fluorophenylalanine on Fowl Plague Virus Multiplication 676

rnest Winocour and Leo Sachs. Cell-Virus Interactions with the Polyoma Virus. I. Studies on the Lytic Interaction in the Mouse Embryo System 699

eo Sachs and Marian Fogel. Polyoma Virus Synthesis in Tumor Cells as Measured by the Fluorescent Antibody Technique . . 722

mma G. Allen, George Ostroff, and Marianna R. Bovarnick. Inhibition of the Cytochrome Reductase Activity Associated with Meningopneumonitis Virus by Fatty Acids Derived from Infected Allantoic Fluids 737

. G. Weathers. Yellow-Vein Disease of Citrus and Studies of Interactions between Yellow-Vein and Other Viruses of Citrus 753

. S. Porterfield and C. E. Rowe. Hemagglutination with Arthropod-borne Viruses and Its Inhibition by Certain Phospholipids 765

ISCUSSION AND PRELIMINARY REPORTS

F. E. Nitzany and S. Cohen. A Case of Interference between Alfalfa Mosaic Virus and Cucumber Mosaic Virus 771

Glenn A. Gentry, Charles C. Randall, and Robert W. Darlington. Composition of RNA and DNA of Citric Acid-Isolated Liver Nuclei from Hamsters Infected with Equine Abortion Virus 773
